Economic Highlights

Consumer and Business Confidence Bouyant in Q2 2011

Consumer and Business Confidence remained buoyant in the Second Quarter of 2011, according to the Jamaica Chamber of Commerce Conference Board. While Consumer Confidence surged, Business Confidence slipped from decade's high levels recorded in Q1 2011.

The Index of Consumer Confidence was 116.8 in Q2 2011, up from 105.9 in Q1 2011 and well above the 102.1 recorded in Q2 2010. The main factors boosting consumer confidence was a perception that the economy was improving, and the expectation that their prospects would be lifted by the rising economy in the near to medium-term. According to the JCC Conference Board, " Consumers judged the current state of the economy more favourably in the 2nd quarter of 2011 than any time since 2008". While only 5% cited

Economic Bulletin Page 2 June 2011

Net International Reserves (NIR)

During June 2011, Net International Reserves decreased by a further US\$67.25 million to US\$2,267 million compared to US\$2,334 million at the end of May 2011. This mainly reflected GOJ continued redemption of US\$400 million in Eurobonds issued in March 2011.

At current levels, gross reserves are adequate to finance 28.44 weeks of "goods" imports or 21.36 weeks of "goods and services" imports, well above the 12 weeks international benchmark of reserves adequacy.

Foreign Currency Deposits

During April 2011, foreign currency deposits (FCD's) in the local financial system increased moderately by -US\$48.32 million or 2.07% to US\$2.34 billion compared to US\$2.288 billion at the end of March 2011. The increase in April 2011 probably reflects moderate safe haven buying of the USD due to the protracted delay in the IMF releasing the results of Jamaica's performance of the Q4 2010 and Q1 2011 quarterly tests.

April's increase marks a reversal of trend and sentiment, because as the BOJ explained, FCD's increased during 2010 compared to 2009 because investors preferred holding Jamaican dollar denominated assets due to the improving stability of the Jamaican macroeconomy and the sufficiency of foreign exchange. Now sentiment seems to have become more cautious.

Foreign Exchange Rate

US DOLLAR: During June 2011, there was continued modest depreciation of the J\$ dollar against its US counterpart of J\$0.13 cents or 0.16% to J\$85.91 from J\$85.78 at the end of May 2011. This adds to a smaller decline of 0.05 cents in May 2011. Following the successful implementation of the Jamaica Debt Exchange in March 2010, the J\$ appreciated sharply by 3.4% against the USD from about J\$89.50 to J\$86.0. Since June 2010 however, the J\$ has consolidated in a narrow J\$1.25 range between J\$85.25 and J\$86.50 per US dollar. Indeed,

apart from short periods of one or two weeks, the USD has mostly traded below J\$86.0 since June 2010 and has sold for less than J\$86.0 for the first six months of 2011. But now concerns about the IMF's delayed assessment of Jamaica's performance under the last two quarterly tests may be weighing on sentiment and leading to moderate safe haven buying of the USD. Despite depreciating over the past two months, the J\$ is still up by a slight 0.05 cents against the USD year to date.

POUND & CANADIAN DOLLAR:

During June 2011, the J\$ strengthened against GBP by an additional J\$3.23 or 2.3% to sell for J\$137.77 adding to its J\$1.37 appreciation in May 2011. Against the CAD, the J\$ also appreciated by a further 0.68 cents to J\$88.61 adding to its' J\$0.67 rise in May 2011. The movement of the J\$ against GBP and CAD has see-sawed since July 2010, but has been more down than up. Despite the partial retracement over the past two months, year to date, GBP ia up against the Jamaican dollar by J\$4.02 or 3.01% and the CAD is up by J\$3.27 or 3.83%%.

Interest Rates

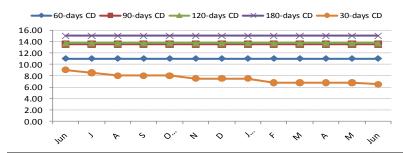

The downward movement of Jamaica's interest rates which began with the JDX in March 2010, continued in June 2011, but at a much slower pace than in Q2 and Q3 of 2010 when rates in the public sector declined by as much as 600 bps.

In June 2011, there was movement on only two rates - the 6-month Treasury Bill and the Bank of Jamaica 30-days Certificate of Deposit. Citing subdued inflation and aggregate demand and adequate foreign reserves, the BOJ clipped an additional 25 bps from its' 30-days CD to 6.5%. This is the second reduction in the 30-day since the beginning of the year and follows a much bigger reduction of 75 bps in February 2011. Year to date, the 30-days CD has fallen 100 bps, the largest reduction on any rate for the year.

In relation to the 6-month T-bill, interest rates inched up by 3 bps to 6.61%

Source: Bank of Jamaica (BOJ Preliminary)

after declining by16 bps to 6.55% the previous month. After been the stalking horse for rate reductions in 2010 with dramatic declines of 9.32% or 932 bps, the 6-month T-Bill has been struggling to achieve further reductions in recent months. In November and December 2010, it was unchanged at 7.48%, and appeared to have hit bottom. But in February 2011, it resumed significant decline with a substantial 71 bps drop followed by a 5 bps drop in March 2011 to 6.70%. In April 2011, the rate on the 6-Month T-bill reversed course with a slight increase of 4 bps followed by May's decrease

of 16 bps.

Both the average lending rate and the average saving rate were unchanged during June 2011. The BOJ's and the GOJ longer-term instruments have been unchanged since January 2010, as the GOJ continues its' policy of trying to recalibrate interest rates at lower levels.

Base Money & Money Supply

The BOJ reported that during the March 2011 quarter, broad Jamaica Dollar money supply (M3J), increased

C&WJ Broadband Telephone System for Business: Need efficient and economical telephony system across multiple locations? C&WJ Broadband Telephone system for Business is the perfect Solution.

Includes traditional PBX system capabilities with call transfer, call forwarding, voicemail, extension-to-extension dialing, central computer storage for email, voice, fax messages and more. Call: 1-888-225-5295

NCB Receivables Financing: Give your business an unsecured line of credit that makes available up to 75% of invoiced goods and services up to a maximum of \$10m

Provide immediate cash to fill cash flow gaps and access to much needed working capital. Both NCB customers and those supplying goods and service to approved customers are eligible to apply. Call: 1-888-NCB-FIRST for details.

Economic Bulletin Page 4 June 2011

by 0.2%, compared to a reduction of 2.0% for the March 2010 quarter. The marginal growth in Q1 2011 brought the expansion in M3J for the fiscal year to 9.2 per cent, above the 7.3 per cent in FY2009/10, but below the average of 10.5 per cent for the last five fiscal years.

The measure of money supply that includes foreign currency deposits (M3*) increased marginally by 0.1%, relative to a reduction of 1.1% in the corresponding quarter of 2010. Within M3*, foreign currency deposits declined by 0.3%, relative to an expansion of 1.2% for the March 2010 quarter. Consequently, the ratio of foreign currency deposits to total deposits was 27.8 per cent as at end-March 2011, compared to 31.4 per cent at end-March 2010.

In June 2011, the monetary base increased by 1.52% to J\$80,560.55 million quite likely reflecting continuing BOJ post-Easter redemptions.

Inflation

The rate of inflation increased at roughly the same pace of 0.76% in June 2011, compared to a 0.77% rise in May 2011. Within the Consumer Price Index, the division 'Housing, Water, Electricity, Gas and Other Fuels' registered the highest increase (of 1.6%) for the second month in a row, though that rate was slightly less than the 2.2% recorded the previous month. The increase in this division was largely due to a rise in the cost of 200 KWH of electricity as well as in the cost of water.

As in May 2011, the second highest increase of 0.9% was recorded in the most heavily weighted 'Food and Non-Alcoholic Beverages' division. This was mainly due to higher prices for 'Fruits' - up 1.8%, and 'Vegetables and Starchy Foods' -up 1.5%, as the glut in the latter items now appear to have given way to relative scarcity. Three other classes within the division-'Milk, Cheese and Eggs', 'Oils and Fats', 'Sugar, Jam,

Source: Jamaica Bauxite Institue (JBI)

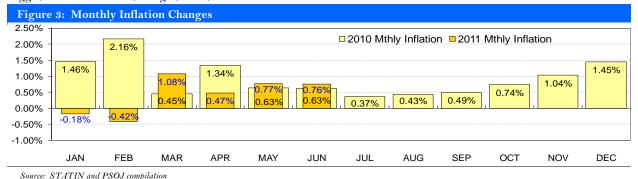

Honey, Chocolate and Confectionary' each recorded increases of 0.9%; while within the group 'Non-Alcoholic Beverages', the classes 'Coffee, Tea and Cocoa', and 'Mineral Waters, Soft Drinks, Fruit and Vegetable Juices' recorded increases of 1.5% and 0.5% respectively.

The third highest increase in the CPI in June 2011 was recorded in the division 'Clothing and Footwear' which rose by 0.7%. Two divisions - 'Restaurants and Accommodation Services' and 'Furnishings, Household Equipment and Routine Household Maintenance' each rose by 0.6%. The divisions - 'Education' and 'Communication' were flat on the

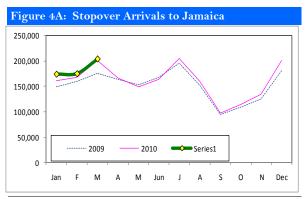

month; while the remaining five divisions within the CPI recorded slight to moderate increases of 0.4% or less. The rate of inflation for the first half of 2011 was 2.5%, which was 4.5 percentage points lower than the 6.8% recorded for the corresponding period of 2010. The point to point rate was 7.2% while for the fiscal year to date, the rate of inflation is 2.0%.

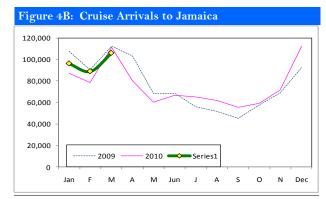

Bauxite & Alumina

Production of alumina in June 2011 amounted to 152.4 tons compared to 112.9 tons in June 2010 - a 34.9% increase. For its part, production of crude bauxite in June 2011 declined

Tourist Arrivals

Source: Jamaica Tourist Board (preliminary data)

Source: Jamaica Tourist Board (preliminary data)

marginally by -0.75% to 343.2 tons compared to 345.8 tons in June 2010.

During calendar year 2010, alumina production fell by -10.3% to 1,590.6 tons and alumina exports by -16.4% to 1,575.3 tons compared to the same period of 2009. But this was a much lower than the -60% contraction in 2009 relative to 2008.

Reflecting the upturn in the industry, production of crude bauxite was up 35% to 4.32 million tons during 2010, compared to 3.2 million tons for 2009. Bauxite exports were also up by 34.6% to 4.3 million tons. For the first six months of 2011, alumina production is up by 44.7% to 986,706 tons, while production of crude bauxite is up by 20.5% to 2.5 million tons.

The year to date increases in bauxite and alumina production in June 2011 therefore reflects a continuation of the upturn in the industry which gathered pace in July 2010 with the reopening of Windalco Ewarton plant.

Tourism

Stopover arrivals in March 2011 were 204,046—an increase of 1.3% over the 201,378 recorded in March 2010. For the calendar year to date (Jan-Mar 2011), stopovers increased by 4.4% with 553,304 compared to 529,934 arrivals in 2010. The number of cruise passengers however, decreased by 4.6% in March 2011 to 106,247 visitors compared to 111,356 in March 2010. During calendar year 2010, stopovers increased by 4.9% to 1,921,678 compared to 1,831,097 in 2009, but fell 4% short of the 2 million stopovers the GOJ had targeted for 2010. For 2011, the GOJ is targeting a 6% to 8% rise to 2,030,000.

Regionally, stopovers from the US declined by 5.9% in March 2011 to 121,596

	2010	2011	%Change

Source: Jamaica Tourist Board (preliminary) & BOJ BOP Statistical Update

compared to 129,168 in March 2010. Year to date (Jan-Mar 2011), stopovers from the United States are down slightly by -0.9% to 309,120 compared to 312,004 during Jan-Mar 2010. From the Canadian market, stopovers increased by 31.5% in March 2011 with 53,856 arrivals, compared to 40,962 in March 2010. Year to date, stopovers from Canada are up 23.4% to 162,143 visitors compared to 131,349 visitors in Jan-March 2010.

Visitors from Europe, including the UK, decreased by 12.2% in March 2011 to 21,802 compared to 24,826 arrivals in March 2010. Year to date, stopovers from Europe are down -8.4% to 62,549 compared to 68,266 in 2010. Stopover arrivals from the Caribbean decreased during 2010 by a significant 10.8% to 58,299 compared to 65,333 in 2009. But for the first three months of 2011, stopovers from the Caribbean are up 8.1% to 13,303 visitors compared to 12,302 for the corresponding three months period of 2010. Stopovers from Latin America were also down 7.2% to 13,442 in 2010. But for the first three months of 2011, stopovers from Latin America are up by 4.9% to 3,541 visitors.

During calendar year 2010, cruise visitors to the Island decreased slightly – by 1.4% to 909,619 visitors. For the

first three months of 2011 however, cruise arrivals are up by 5.1% to 291,553 visitors. Total Visitors to the island for Jan-March 2011 were 844,857 marking a 4.7% increase relative to the 807,227 during Jan-March 2010.

External Trade

During the First Quarter, January -March 2011, Jamaica's exports increased by US\$36 million or 10% to US\$395.9 million, compared to US\$359.9 million in January - March 2010. Imports for their part, surged by 19.0%, to US\$1.42 billion compared to US\$1.19 billion during January - March 2010. As is usually the case when economic conditions are picking up globally and in Jamaica, the negative imbalance in Jamaica's trade worsened in Jan-March 2011 by -US\$190.3 million or 22.8% to -US\$1.02 billion compared to -US\$833.0 million in January- March

Traditional Exports: For the first three months of 2011, traditional domestic exports earned US\$205.1 million, an increase of US\$44.72 million or 27.9% over the US\$160.4 million recorded in Jan-March 2010. The share of traditional exports in

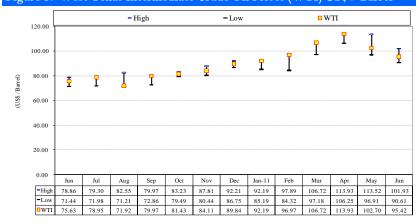

total domestic exports also increased from 44.7% in Jan-March 2010 to 51.8% during Jan-March 2011. Increases in several traditional exports items, contributed to the overall increase in traditional exports. Earnings from Alumina exports led the way rising by 45.3% to US\$125 million compared to US\$86.04 million in Q1 2010; while Bauxite exports rose by 14.6% to US\$34.92 million. Earnings from sugar exports also increased significantly by 15.7% to US\$26.9 million and so was rum - up 13.3% to US\$13.9 million compared to US\$12.3 million in Jan-March 2011.

But there were notable declines in (traditional) Agricultural exports overall, and in particular coffee. Traditional Agricultural exports which had declined by -36.2% to US\$24.9 million during 2010, continued their decline in the First Quarter of 2011, declining by -51.9 % to US\$3.4 million compared to US\$7.0 million in Jan-March 2010. This was largely due to a steep -63.4% drop in the value of coffee exports, from US\$5.07 million to US\$1.86 million, as the premium prices normally paid for Jamaican coffee has just not been forthcoming since the global recession from price conscious consumers. Earnings from 'Other' Traditional exports also decreased notably during Jan-March 2011 by 22.5% to US\$2.53 million.

Non-traditional exports accounted for 50.4% of exports by value in calendar year 2009 surpassing earnings from traditional exports. But due to the recovery in the Bauxite/Alumina industry in 2010 and significant declines in several non-traditional exports groups, traditional exports again moved to the top in 2010. During the First Quarter of 2011, earnings from non-traditional exports continued to decline by -2.0% to US\$173.9 million compared to US177.4 million in Jan-March 2010.

The main contributor to the decline in non-traditional exports was a significant -12.1% decline in "Other" non-traditional exports; in particular, a steep -US\$19.5 million or -71.0% drop in 'Chemicals (incl. Ethanol)' from US\$27.5 million in Jan-March 2010 to US\$8.0 million in Jan-March 2011. This almost completely accounted for the overall drop in non-traditional exports. There were however smaller declines counter-balanced by increases for various items.

In the category "Food", there was a 19.6% increase in earnings to US\$35.8 million compared to US\$29.9 million in Jan-March 2010. Among the main contributors to the increase in 'Food' earnings were: a 75% increase in 'Fish, Crustaceans & Molluscs' to US\$1.5' million; a 56% increase in 'Dairy Products & Birds Eggs' to US\$\$4.0 million; and a 33% increase in 'Baked Products'

to US\$5.6 million. Earnings from 'Sauces' were also up by 52.8% to US3.3 million and 'Yam' exports were up by 8.4% to US\$4.95 million from US\$4.6 million in Q1 2010.

There were however, notable decreases in earnings from a few 'Food' categories in Jan-March 2011 relative to Jan-March 2010. Earnings from

'Other Fruits & Fruit Preparations' declined by -35.4% to U\$\\$656,000 from U\$\\$1.02 million in Jan-March 2010. Earnings from 'Papaya - fell significantly by -29.7% to U\$\\$470,000; and earnings from 'Juices excl. Citrus' were down modestly by -4.5% to U\$\\$1.62 million from U\$\\$1.62 million.

'The 37.3% increase in earnings (US\$22.9) from exports of "Crude Materials" in 2010 was the largest increase recorded by any group of nontraditional exports in 2010. During Jan-March 2011, earnings from "Crude Materials" continued to be Jamaica's leading Non-Traditional export. Exports of 'Limestone' increased by 72.6% to US\$1.60 million from US\$924,000 a year earlier; and earnings from 'Waste and Scrap Metals' doubled by 125.7% to US\$7.7 million in Q1 2011 compared to US\$3.4 million in Q1 2010. Earnings from 'Other' Crude Material declined however by -50.9% to US\$801,000 from US\$1.6 million in Jan -March 2011.

Imports. The 39.4% decline in Jamaica's imports observed in 2009 due to depressed domestic demand brought on by the global recession, appears to have abated in 2010 with the onset of the global recovery growing modestly by 2.7%. During the first three months of 2011 however, imports surged by 19.0% to US\$1.42 million relative to US\$1.19 million in Jan-March 2010.

With only two exceptions all categories of imports recorded increases. The largest increase was recorded in Raw Materials/Intermediate Goods which typically accounts for the bulk of imports. In this category, imports increased by 26.5% to US\$880.4 million from US\$696.1 million in Jan-March 2010. The greatest contributor to that increase in money terms were imports of 'Mineral Fuels etc.' which was up US\$105.5 million or 25.5% to US\$519.4 million from US\$413.8 million in Jan-March 2010. Imports of 'Food' for intermediate use also increased impressively by 67.5% to US\$73.04 million from US\$43.6 million one year earlier; while 'Industrial Supplies' grew by 19.4% to US\$219.6 million. Parts & Accessories Of Capital Goods' increased by 25.4% to US\$68.7 million.

Possibly reflecting expansion or retooling by Jamaican firms, imports of 'Capital Goods (excl. Motor Cars)' registered the second largest increase of 20.3% to US\$103.8 million after two

consecutive annual declines. All categories of Capital Goods imports registered increases. 'Other Industrial Transport Equipment' was up 47.1% to US\$14.7 million; 'Machinery and Equipment' by 19.4% to US\$58.5 million from US\$48.9 million and 'Construction Materials' by 11.0% to US\$29.12 million from US\$26.2 million and in Jan-March 2010.

Imports of Consumer Goods (excl. Motor Cars) also increased in Q1 2011, though more moderately by 5.9% to US\$401.1 million in the first three months of 2011. Imports of 'Food (incl. Beverages)' were up 20.0% to US\$185.8 million and 'Other Durable Goods (excl. Motor cars) were up 2.3% to US\$72.6 million, but imports of 'Non-durable Goods' declined by -7.6% to US\$114.2 million from US\$123.5 million and 'Semi-Durable Goods' imports declined by -3.4% to US\$28.9 million from US\$29.9 million in Q1 2010. During Jan- March 2011, imports of 'Passenger Motor Cars' increased by 14.0% to US\$28.12 million from US\$24.7 million one year earlier.

Oil: At the end of June 2011, the

price of West Texas Intermediate (WTI) Crude Oil stood at U\$\\$95.42 per 42 gallon barrel - a decrease in price of U\$\\$7.28 compared to the closing price of U\$\\$102.70 the previous month. During June 2011 the price ranged between a low of U\$\\$90.61 and the high of U\$\\$101.93 per barrel before closing at U\$\\$95.42 (See Fig. 5)

Balance of Payments

For the first two months of 2011, there was a current account deficit of US\$152.0 million, which represented a deterioration of US\$130.4 million relative to the corresponding period in 2010. The deterioration in the current account resulted primarily from the goods sub-account.

During the period, the Goods Balance recorded a deficit of US\$535.6 million, a deterioration of US\$123.1 million when compared to the corresponding period in 2010. This resulted primarily from an increase in imports of US\$145.9 million, which was significantly influenced by an increase in mineral fuel imports of US\$70.0 million. The deterioration in the goods sub-account was partially offset by a

US\$22.8 million increase in exports, stemming mainly from an increase in

alumina exports of US\$38.8 million. During the review period, there was a marginal decline in the surplus on the Services Sub-account of US\$0.6 million while the Income Sub-account deteriorated by US\$24.1 million. This deterioration emanated primarily from an increase in profits remitted by foreign companies. During the review period, Current Transfers increased by US\$17.4 million to US\$308.8 million. This improvement resulted primarily from an increase in net private transfers of US\$15.3 million.

Flows from official and private sources were more than sufficient to finance the current account deficit. Consequently, the NIR increased by US\$300.0 million during the period.

Fiscal Accounts

During the first two months of FY 2011/12, (Apr-May) the GOJ ran a fiscal

deficit of J\$6.5 billion. This deficit was -J\$3.8 billion less than the -J\$10.26 billion budgeted and mainly resulted from a J\$3.9 billion cutback in expenditures to J\$52.3 billion relative to the J\$56.2 billion that was budgeted. A modest shortfall in Revenues and Grants of -J\$113 million or 0.25% also contributed to the fiscal deficit for the period.

REVENUE: Total Revenues & Grants to the GOJ during April-May 2011/12 was J\$45.86 billion. This was a little (-JS113.3 million) below budget as noted, but also marginally lower (-J\$401.3 million) than the J\$46.3 billion collected in April-May 2010. The main outperformers on the revenue accounts were PAYE which came in J\$697.0 million above budget; 'GCT (Local)' - up J\$560.0 million; and 'SCT (Imports)' - up J\$287.8 million above budget. Other notable outperformers on the revenue accounts were 'GCT (Imports)'

up J\$169.2 million and 'Education Tax' which exceeded budget by J\$125.4 million.

Among the main underperformers on the revenue accounts were: 'Tax on Interest' - down -J\$711.3 million; STC was down -J\$620.7 million; and 'Non-Tax Revenue' which registered a shortfall of -J\$527.2 million. Notable shortfalls were also recorded by 'Other Companies Taxes' which came in -JS55.5 million below budget and 'Capital Revenues' - down -J\$48.9 million.

EXPENDITURE: During the first two months of fiscal year 2011/12, there was a significant J\$3.9 billion (-6.9%) cutback in planned expenditures to J\$52.3 billion relative to the J\$56.2 billion budgeted. This reduced expenditure resulted from a J\$2.4 billion reduction in expenditures on 'Capital Programmes'; a J\$941.5 million reduction in domes-

tic interest payments and a –J\$199.7 million reduction in external interest payments; plus a –J\$352.3 million reduction in 'Wages and Salaries'.

FISCAL OUTTURN

As noted, during the first two months of FY2011/12 (April-May 2011), the Budget recorded a fiscal deficit of J\$6.5 billion due largely to expenditure curtailments of -J\$3.9 billion which more than compensated for a small -J\$113.3 million shortfall in revenues. During FY2010/11, there was a fiscal deficit of -J\$74.2 billion amounting to 6.1% of GDP which represented a 40.2% improvement on the deficit of -J\$123 billion recorded in 2009/10. For FY2011/12, the GOJ is projecting a deficit of -J\$61.8 billion or 4.7% of GDP. The current average monthly deficit of J\$3.25 million is therefore well below the J\$5.0 million targeted.

The Primary Surplus - the difference between total revenues and non-interest expenditures for FY2010/11 was J\$54.1 billion or 5.6% of GDP. This fell short of budget by J\$7.15 billion or 11.7% relative to the J\$61.3 billion originally budgeted. For the first two months of FY2011/12, the primary surplus was J\$7.4 billion. which was J\$2.6 billion or 56.2% greater than J\$4.7 billion budgeted.

PUBLIC DEBT: Total public debt at the end of FY2010/11 stood at \$1.570 trillion compared to J\$1,434.8 trillion at the end of FY2010/11. This represents an additional \$136.0 billion added to the debt stock during 2010/11. During the first month of FY2011/12, (April 2011) the total public debt increased by J\$2.5 billion to J\$1.572 trillion. The domestic debt is estimated at J\$809.2 billion or 51.4% of the total, while the external debt amounts to J\$763.6 billion (US\$8.9 billion) or 48.6% of the total debt stock. The increase in the debt stock in April 2011 resulted entirely from external borrowing, continuing GOJ policy to seek out lower interest external loans which accounted for of GOJ borrowing FY2010/11.

Stock Market

During June 2011, market capitalization decreased marginally by J\$68.0 million or 0.001% to close at J\$596.79 billion. Three of five indices on the Jamaica Stock Exchange advanced

Economic Highlights

(contd. from page 1.)

The Global Picture

Economic discussion in the global space

in early June 2011, was dominated by concerns about the heightening of the Greece debt and funding problems and the seeming spread of the contagion to Italy. Towards the end of June, the European debt problem was overtaken by the urgency of raising the United States borrowing limits by August 2, 2011 to avoid a market

shattering default as part of a credible longer-term deficit reduction program.

European Sovereign Debt

For many market participants, the question is not 'if' Greece will default, but whether it has defaulted on its debts. The market defines 'default as missing a scheduled repayment or rescheduling debt without the voluntary compliance of the creditors'. Since the establishment of the European Financial Stability Facility (EFSF) in May 2010, European leaders have tried to persuade markets that the €750 billion in loan guarantees was sufficient to back-stop any problem a Euro-member was experiencing and that they were committed to providing needed support in a proactive fashion. While many Euroactors have long suggested that the private holders of European sovereign debt should share the burden when countries are experiencing repayment or funding difficulties, others have resisted to avoid any appearance of default. After a recent meeting of Euroleaders, it was agreed that the 'offer' of certain private holders of Greek government debt to accept longer maturities and lower interest would be included in the latest package of assistance to Greece. The market seems to have accepted the limited rescheduling by Greece without major upheavals, though there was another round of the

now frequent downgrades by certain credit rating agencies. It is possible therefore, now that the genie is out of the bottle, that there could be a broadening of rescheduling to many of the other countries experiencing funding problems, and this could become one of the acceptable tools for dealing with the European funding crisis.

US Facing Possible Default

Even as a window of opportunity appears to be opening for dealing with European sovereign debt, the Obama Administration and the Congress appears to be pushing the United States to the brink of default and credit downgrade with their seeming inability to agree on a compromise solution to raise the US debt ceiling as part of a longerterm program to reduce the US budget deficit. The Republicans in Congress dominated by about 100 limited Government, anti-spending ideologues are adamant that the balancing of the US books be achieved by spending cuts, while the Democrats are insisting on a more "balanced" approach that would reduce the US deficit by \$4 trillion over 10 years through a 1 to 3 combination of new revenues, and spending cuts. At the time of writing both sides seem unyielding, though public opinion does seem to favour the more balanced approach advocated by the Democrats.

Credit rating agencies Moody's and Fitch have both warned, that even if the debt ceiling is raised, they might downgrade the US if a deficit reduction plan falls short of US\$4 trillion.

While it is difficult to predict the likely consequences, many like the IMF believe, that a US default and downgrade would have "universally large and negative effects". Giltedged funds that can only hold AAA bonds on their books would have to immediately sell-off their US bonds; risk aversion would likely run through equity markets leading to a massive dumping of stocks; US interest and mortgage rates would rise; and the US Treasury might be forced to halt 40% of its payments since 40 cents of every dollar the US currently spends comes from loan receipts. As Macroeconomic Advisers warn, a US default or downgrade could lead to an "instant recession".

Over the past three months, the US economy has been slowing and US tourist arrivals in Jamaica has contracted year over year. Given our many connections and great dependence on the US there is little doubt that Jamaica would follow the US into recession if that were to result from US downgrade or default.

The Economic Bulletin is a monthly synopsis of the major developments impacting the Jamaican economy. It covers a wide range of areas including inflation, the financial markets, fiscal accounts, tourism, the productive sectors and external trade. In addition to tracking changes in the main indicators, it also goes behind the numbers to examine the underlying factors driving those changes. The Bulletin also provides insight into how current trends may shape developments going forward in order to help inform your business decisions.
